COMPANY PROFILE

Hexagon Infosoft Solutions

Envision. Innovate. Transform.

AI-Powered Digital Transformation Partner

A team that cared more about outcomes than output

Hexagon Infosoft Solutions Pvt. Ltd. was founded in 2013 by engineers who were tired of watching great technology fail to move the business. We started with a simple promise to our first clients: we will own the outcome, not just the deliverable. That promise still anchors every engagement today.

Over the last decade, Hexagon Infosoft Solutions has emerged as an enterprise technology partner trusted across 20+ countries, delivering intelligent business systems that compound in value over time.

“We never wanted to be the biggest software company. We wanted to be the partner enterprises trust with the systems they cannot afford to get wrong.”

Our Core Values

These values are how we make trade-offs under pressure guiding every decision from architecture reviews to hiring.

Outcomes over output We measure ourselves by business results unlocked, not code volume shipped.

Engineering rigor Architecture reviews, testing discipline, and observability are non-negotiable.

Partnership mindset We embed with your teams and optimize for the long term, not the next milestone invoice.

Pragmatic innovation We adopt emerging technology where it creates real leverage, never for its own sake.

Radical clarity Transparent roadmaps, honest trade-offs, and explainable decisions at every layer.

Craft & ownership Every engineer owns quality end-to-end, from first commit to production reliability.

Our Mission

To engineer intelligent business systems that turn enterprise complexity into measurable, durable advantage pairing deep domain understanding with disciplined software engineering.

Our Vision

A world where every enterprise operates on adaptive, AI-ready platforms that compound in value over time, rather than depreciating stacks of disconnected tools.

An engineering partner, not a staffing vendor

Hexagon Infosoft Solutions combines AI engineering, cloud foundations, enterprise integration, and user-centered design to build adaptive software platforms.

- AI & Intelligent Automation Autonomous agents, copilots, document intelligence, and RAG grounded in enterprise data.
- Enterprise Platforms Composable, multi-tenant foundations designed to consolidate fragmented legacy systems.
- Cloud Engineering Well-architected, cost-aware cloud foundations across AWS, Microsoft Azure, and Google Cloud.
- Digital Commerce & Mobile Headless, high-conversion commerce and native mobile apps engineered for scale.
- DevOps & Quality Rigor Automated CI/CD pipelines, IaC, security compliance, and production reliability.

Tech Stack

Hexagon is not a place for monotonous work, but a concept where team building and knowledge growth are the primary focus.

DevOps

7 tools

-  Jenkins
-  CI/CD
-  AWS
-  Azure
-  Google Cloud
-  Docker
-  Kubernetes

Database

6 tools

-  Oracle
-  MongoDB
-  PostgreSQL
-  DynamoDB
-  MySQL
-  MariaDB

Mobile Apps

7 tools

-  Swift
-  Flutter
-  React Native
-  Java
-  Android
-  iOS
-  Kotlin

Open Source

4 tools

-  WordPress
-  HubSpot
-  Shopify
-  Magento

Front End

7 tools

-  React JS
-  Angular JS
-  HTML5
-  Next JS
-  Gatsby
-  Nuxt JS
-  Vue JS

Back End

5 tools

-  Ruby on Rails
-  Python
-  Golang
-  Laravel
-  Node.JS

AI & ML

8 tools

-  OpenAI
-  Anthropic Claude
-  Vercel AI SDK
-  LangChain
-  RAG
-  TensorFlow
-  PyTorch
-  Hugging Face

Prestigious Clients & Partners

Over the years, we have built trusted partnerships across telecommunications, medical, and civil sectors globally. We place a dedicated emphasis on defense technologies, providing specialized, high-grade solutions for armed forces requirements. Every project reflects our commitment to complete client satisfaction through secure, innovative, and cost-effective delivery.

Ways to work with us

Flexible commercial models that match your certainty, timeline, and in-house capacity with the same senior delivery standard across all of them.

Rapid PoC

De-risk innovation with a working prototype

BEST FOR

Testing feasibility & validating business ideas

- ✓ 2 to 4-week rapid prototype sprint
- ✓ Production-quality core architecture
- ✓ Clear ROI & feasibility report
- ✓ Seamless transition to full build

Dedicated Team

A cross-functional squad, fully embedded

BEST FOR

Long-term roadmaps & evolving scope

- ✓ Product, design & engineering pod
- ✓ Scales up or down monthly
- ✓ Direct Slack & standup access
- ✓ Predictable monthly investment

Fixed Scope

Defined outcomes, fixed timeline & budget

BEST FOR

Well-specified projects & MVPs

- ✓ Milestone-based delivery
- ✓ Fixed price & schedule
- ✓ Clear acceptance criteria
- ✓ Ideal for board-approved budgets

Staff Augmentation

Vetted specialists into your team

BEST FOR

Filling capability or capacity gaps

- ✓ Hand-picked senior engineers
- ✓ Onboard in days, not months
- ✓ You retain delivery ownership
- ✓ Full IP & security compliance

Agile at the core

Standing tall since 2013, Hexagon Infosoft Solutions has learned not only from success but from failures too helping us understand what you, as a client, really need.

Scrum

A framework for agile project management, widely used in software development yet applicable to many kinds of projects.

Kanban

A visual framework for managing and continuously optimizing work processes and project throughput.

Extreme Programming

A methodology aimed at improving software quality and responsiveness to changing customer requirements.

New Age Tech

Mixed Reality (MR)

A continuum that encompasses both augmented reality (AR) and virtual reality (VR) technologies.

AI / ML

A top AI application development team helping businesses add intelligence to their ecosystems with AI-driven applications and integrations.

Internet of Things (IoT)

A leading provider of connected IoT services and solutions across industries.

Blockchain Development

Designing, coding and maintaining secure decentralized applications.

Core Offerings

Ten deeply-staffed practices that combine into end-to-end platform delivery for modern enterprises.

AI & Intelligent Automation

Autonomous agents, copilots, document intelligence and decisioning grounded in enterprise data.

Enterprise Platforms

Composable, multi-tenant platforms designed to consolidate fragmented legacy systems.

Cloud Engineering

Well-architected, cost-aware cloud foundations across AWS, Microsoft Azure and Google Cloud.

Digital Commerce

Headless, high-conversion commerce and unified omnichannel customer experiences.

IoT & Smart Industry

Connected devices, telemetry pipelines and real-time operational intelligence.

Data & Analytics

Lakehouses, streaming pipelines and governed analytics that business leaders trust.

Mobile Solutions

Native iOS, Android and cross-platform apps engineered for scale and reliability.

UI/UX Design

Research-led product design and enterprise design systems like Hexagon Design System.

Enterprise Integration

Event-driven integration, API management and legacy modernization without downtime.

DevOps & Platform Engineering

CI/CD pipelines, IaC and internal developer platforms that accelerate every engineering team.

Industries We Serve

Domain-aware technology platforms tuned to your regulatory, operational, and customer context.

Manufacturing & Smart Industry

Smart factory telemetry, predictive maintenance AI, and connected supply chains.

Healthcare & Life Sciences

FHIR-compliant interoperability engines, EHR integration, and digital health platforms.

Logistics, Supply Chain & Mobility

Real-time fleet tracking, dynamic route optimization, and WMS/TMS platforms.

Retail & E-commerce

Headless commerce, personalized search, omnichannel portals, and high-conversion storefronts.

Financial Services & Fintech

PCI-DSS compliant payment gateways, automated KYC/AML verification, and risk engines.

Travel & Hospitality

Dynamic pricing engines, booking systems, and disruption management.

Education & EdTech

Adaptive learning portals, student management systems, and interactive learning tools.

Government & Public Sector

Secure, accessible, and compliant public digital services.

Expertise in action

Since our foundation in 2013, Hexagon Infosoft Solutions has offered world-class IT consulting and outsourcing web and mobile app development, software development and custom app development.

AWARDS WON

Security & IP

Security and data protection are embedded across our software development lifecycle not bolted on before launch. Every engagement protects your intellectual property with the same rigor we bring to architecture and code.

Secure SDLC

Security reviews, threat modeling, and access controls are built into every phase of development, from design to deployment.

IP & Data Protection

Your intellectual property and data stay yours protected by strict confidentiality agreements and access-controlled infrastructure at every stage.

Enterprise Compliance

We build to recognized security standards ISO 27001 and GDPR-ready practices so your platform is audit-ready and data-secure from day one.

Predictable delivery. Measurable results.

Our delivery methodology combines agile velocity with engineering governance across eight continuous phases.

01

Discover

Map business goals, constraints, systems, and success metrics with stakeholders.

02

Plan

Prioritize opportunities and define a pragmatic, value-sequenced roadmap.

03

Design

Architect scalable, secure foundations and validated UX flows and prototypes.

04

Develop

Build production-quality software in tight, testable increments.

05

Test

Validate quality, performance, security, and accessibility before release.

06

Deploy

Ship safely with automated pipelines, observability, and rollback strategies.

07

Support

Operate reliably with SRE coverage and responsive production support.

08

Optimize

Measure against KPIs and keep compounding value post-launch.

What sets our engineering apart

Six differentiators embedded in every platform shipped by Hexagon InfoSoft Solutions.

KPI-linked

Outcome-driven delivery

Engagements are anchored to business KPIs and value milestones, reviewed with leadership.

10x ready

Scalable architecture

Composable, multi-tenant foundations that grow with demand instead of buckling.

AI-native

AI readiness by default

Clean data foundations and modular services make every platform AI-capable from day one.

5+ yr avg

Long-term partnership

Dedicated pods, shared roadmaps, and continuous improvement beyond first release.

99.9% SLA

Engineering excellence

Rigorous review, automated testing, and observability that keep systems reliable at scale.

Secure SDLC

Enterprise security

Security, privacy, and compliance embedded across the SDLC not bolted on before launch.

Customers We Serve

From startups to enterprises, our track record speaks volumes. Let our IT consulting approach drive your business goals forward.

Startups

We support startups, guiding entrepreneurs from idea to reality with a consultative approach.

Ideas

Strategy

Investment

Goals

Product Companies

We specialize in optimizing product designs, user experiences and functionalities while offering ongoing support to keep you competitive.

Global Presence

A worldwide footprint with delivery reach across continents, anchored by our headquarters in India.
